

Health Data is Only Valuable if It's Accessible

Protect It with Our Cloud Compliance and Risk Assessment

Let's Break It Down

In as little as **two weeks**, ClearDATA will produce two Compliance Plan options:

1. ClearDATA-Led Remediation Plan

A proposal detailing the cost and effort required for ClearDATA to lead and perform compliance remediations.

2. Workload Redeployment Plan

A compliant environment designed and architected by ClearDATA, with the customer responsible for application deployment and configuration.

The ClearDATA Cloud Compliance and Risk Assessment helps your organization uncover critical insights in your cloud environment's compliance and risk status. Reach out about your free Compliance and Risk Assessment when you sign up for ClearDATA's Managed Health Cloud.*

Can you articulate – or even quantify - the compliance posture of your Microsoft Azure environment? With an increasingly hostile cybersecurity threat landscape and evolving healthcare regulations, it's critical to ensure that your cloud environment exceeds minimum standards in terms of both security and compliance. ClearDATA is able to leverage over a decade of specialized healthcare privacy and security knowledge in protecting countless patient records as healthcare organizations move to the cloud. They are the authority to help assess and remediate both your environment's compliance and risk.

A ClearDATA Cloud Compliance and Risk Assessment will provide a comprehensive evaluation of your existing cloud environment's compliance posture. Our assessment leverages our proprietary CyberHealth™ SaaS Platform, while our seasoned, healthcare exclusive professional services team provides clear analysis of your current posture and actionable steps to bring your environment into compliance. These insights provide a deep dive that lays bare your vulnerabilities and belies unusual insights into PHI fortification and adherence to healthcare regulatory frameworks like HIPAA.

*Subscription to managed health cloud not required.

Full Professional Services Solutions to Meet You Where You Are.
